ABB India: Energy Policy

We at ABB believe that energy is one of the most important components for the sustainable development and must be consumed in a responsible manner. In line with ABB sustainability Target 2030, we are committed towards improving energy efficiency to reduce carbon footprint in our operation. Aligned with ABB's sustainability agenda and commitment to customer-centricity, the company aims to create value for the environment, society, and customers who increasingly seek sustainability in their partnerships. At ABB India Limited, every individual employee, onsite contractor and suppliers working on our behalf have a key role for efficient usage of energy.

As a part of our existing ABB Policy on health, safety, environment, and security, we are committed to establish Energy Management System at the heart of all our activities, including materials procurement, product design, operations, and services in fulfilling our Energy management requirements by adopting following principles:

- Comply with and where practical exceed applicable legal, regulatory and other requirements related to energy efficiency, energy use and energy consumption
- Create awareness amongst employee, onsite contractor and suppliers working on our behalf about energy conservation and its benefits
- Ensure adequate resources are available to work towards achieving the energy objectives and targets and continual improvement of energy management system
- Focus on usage of adequate, dependable & renewable energy supplies and optimize the energy usage by adopting established industry best practices
- Ensure sourcing of energy efficient products and services for Energy performance improvement
- Promote efficient and innovative use of energy across our suppliers and business partners
- Continually monitor and improve energy performance by establishing and implementing strategic energy management practices and reviewing energy objective and targets periodically
- Supports design activities that consider energy performance improvement

Sanjeev Sharma
Country Head and Managing Director, ABB India
