Automation & Power World

Save the date!

Take part in Automation & Power World

Join us for the digital and live conferences

You don't need to wait until March 2017 for an automation and power education: mark your calendars now for the 2016 digital conference series coming this fall.

Enjoy the benefits of attending a professional conference from wherever you are via an internet connection – for FREE. Get leading insight on business hot topics, participate in informative webinars, and chat online with speakers, ABB experts and fellow attendees. Plus, earn valuable professional development hours (PDHs) for each live webinar you attend.

Designed to address today's biggest business challenges for utility; food and beverage; and oil, gas, and chemicals professionals, the APW digital conference series provides practical information and ideas you can put to use immediately to improve your operations and make more effective business decisions.

The 2016 APW digital conference series starts in September. For more information and to access content from past sessions, visit: new.abb.com/apw/digitalconference

Will you be at the Automation & Power World live conference March 13–16, 2017, in Houston, Texas?

Talk one-on-one with industry experts, network in person with colleagues, and see all the latest ABB equipment, technologies and solutions.

From past lessons learned to the future revealed, attending ABB Automation & Power World saves you money, time and manpower. Ask your questions, deliver your feedback to the developers themselves, take advantage of hands-on training by experts and learn from ABB's customers and project managers how to maximize value from your current assets and strengthen your business in today's economy.

THE APW 2016-2017 SERIES IS FREE FOR ABB CUSTOMERS AND OTHER INDUSTRY PROFESSIONALS! PROFESSIONALS!
