

T315H

System 800xA with AC 800M Engineering, Part 2 – Human System Interface

The goal of this course is to learn the engineering of a complete control project using the Extended Automation System 800xA with AC 800M controllers and Control Builder as the engineering tool. Note that this course is split in two parts and the pre-course is T315F or T315C for the controller configuration.

Course type and methods

This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50 % of the course is hands-on lab.

Student Profile

This training is targeted to system and application engineers, commissioning and maintenance personnel, service engineers and system integrators.

Prerequisites

Students should have attended either the course T315C "Engineering with Control Builder" or the course T315F "Engineering with Function Designer" or have knowledge and experience associated with the content of these courses.

Course objectives

Upon completing of this course the participants will be able to:

- Build up a plant model in the Functional and Location Structure
- Configure and modify graphic displays, graphic elements and faceplates
- Manage and configure alarm and events
- Set up the historical data collection and configure trend displays

Duration

The duration is 4 days

- Create and customize an operator workplace
- Configure user accounts and describe how access rights work
- Backup and restore System 800xA data
- Use the import / export tool
- Create simple reports using MS Excel Data Access
- Use bulk data handling
- CAD Drawing and VideONet
- Describe the NLS principles

Main topics

- Plant modeling
- Graphic displays
- Graphic elements
- Faceplates
- Alarm and events
- Historical data collection
- Trend displays
- Operator Workplace
- Security
- Import and export
- Simple reports
- Document manager
- National Language Support (NLS)
- Bulk data handling
- CAD Drawing and VideONet
- High Performance Graphic Displays

Course Outline				
Day 1	Day 2	Day 3	Day 4	Day 5
Course overview	Graphic elements	Alarm and events	Import and export	
Plant modeling	Faceplates	Operator Workplace	Simple reports	
Graphic displays	Historical data collection	Security	Document manager	
	Trend displays		National Language Support (NLS)	
			Bulk data handling	
			CAD Drawing and	
			VideoNet
