

# ABB in Myanmar

Our power and automation technologies help Industries improve productivity, reliability and save energy.

## About ABB in Myanmar

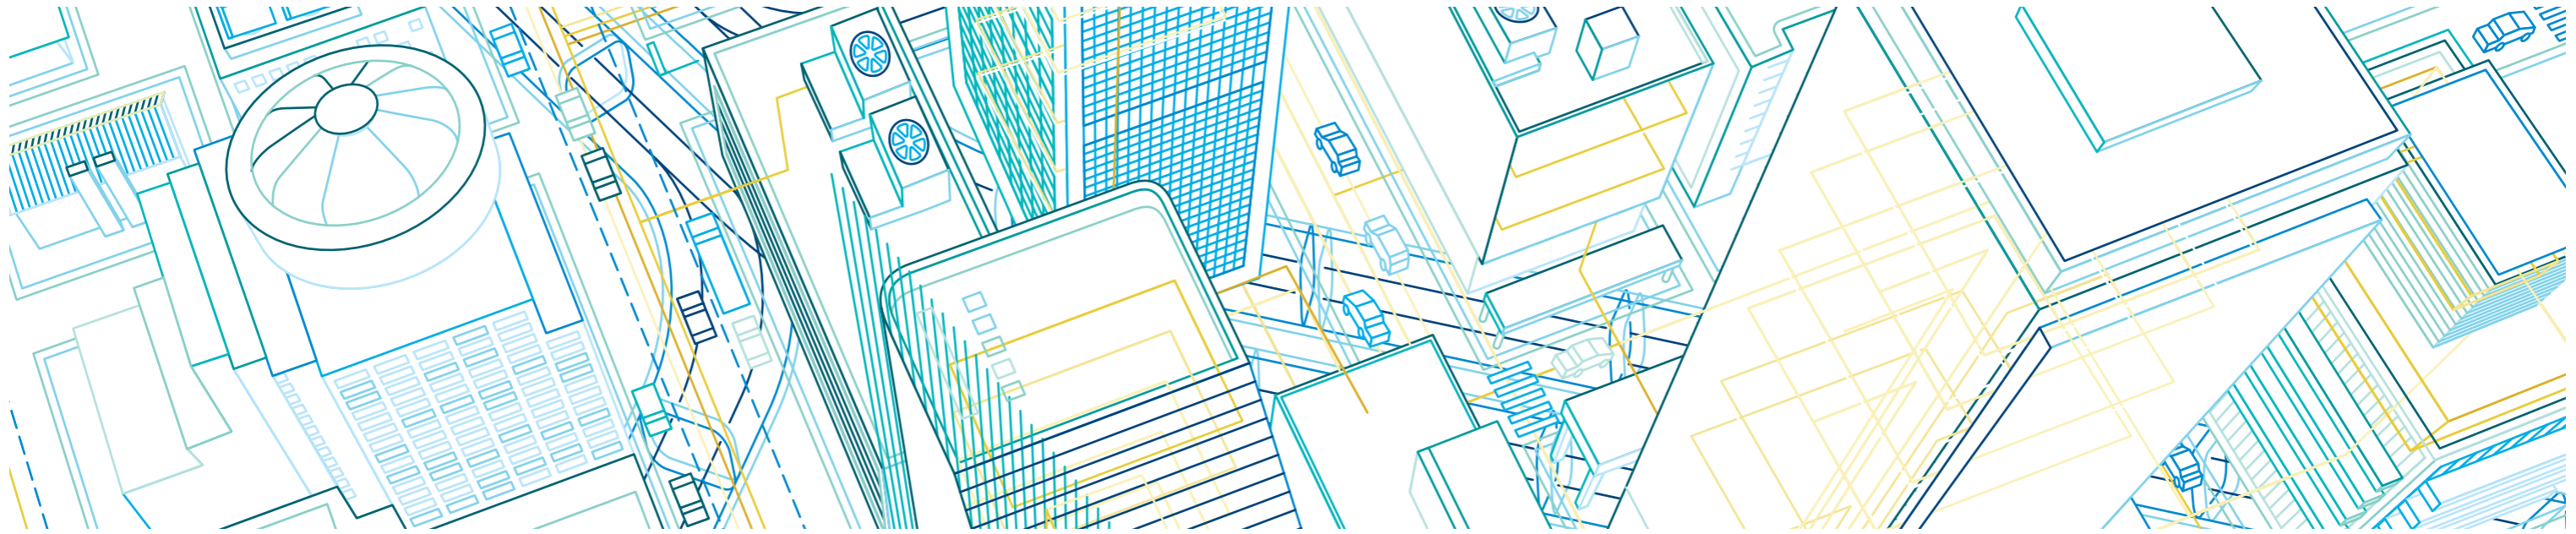

ABB, the leading power and automation group, was established in Yangon, Myanmar, in May 2014. Having a local presence in the Myanmar while closely coordinate with ABB in Thailand will allow us to better serve customers, and improve service capabilities.

To support Myanmar's rapid economic growth, ABB offers its full portfolio of power and automation solutions for secure, energy-efficient generation, transmission and distribution of electricity, and for increasing productivity in industrial, commercial and utility operations.

Our portfolio ranges from switches and sockets to robots, and from large transformers to control systems that manage entire power networks and factories. We help our customers meet their challenges with minimum environmental impact. That's why ABB stands for "Power and productivity for a better world".

## Our vision

## What ABB does

### Our vision

As one of the world's leading engineering companies, we help our customers to use electrical power efficiently, increase industrial productivity, and lower environmental impact.

We believe in delivering power and productivity for a better world.

### Our business principles

#### Responsibility

- Taking responsibility
- Adhering to regulations
- Doing a professional job
- Delivering on our promises

#### Respect

- Celebrating differences
- Discussing, challenging and listening
- Having integrity
- Personal regard for employees and the environment

#### Determination

- Providing a win-win outcome for all stakeholders
- Ensuring continuity
- Be results driven
- Being committed

### ABB's technology leadership

Our technologies improve control over electricity, enabling power networks to be more reliable, efficient, and connected to renewable energy. Our solutions integrate power and automation technologies to improve the efficiency, productivity and quality of our customers' operations while minimizing their environmental impact.

### We are made up of five divisions:

- Power Products
- Power Systems
- Discrete Automation & Motion
- Low Voltage Products
- Process Automation

ABB is a strong player with a strong team in many markets and sectors;

- Automotive
- Buildings and infrastructure
- Cement, minerals & mining
- Data Center solutions
- Chemical solutions
- Energy efficiency
- Food and beverages
- Life sciences
- Marine
- Metals
- Oil and Gas
- Ports
- Power generation
- Power T&D solutions
- Process automation
- Pulp & paper
- Railway
- Smart Grids
- Solar
- Water
- Wind

### Improving quality of life

ABB takes an active interest in the well-being of the communities in which we operate around the world, and supports local and national programs that promote education, the arts and health services.
