

ABB IN THE UNITED STATES

Pinetops, North Carolina

Facility Overview

Location
3022 NC 43 North
Pinetops, NC
27864

Offering
Instrument transformers,
sensors, fused cutouts,
disconnect switches, and
capacitor fuses

Number of employees
384

Operational since
1978

What we do in Pinetops

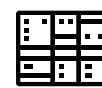

Design and manufacture power quality and power protection equipment for the electric grid. Major outputs from Pinetops include instrument transformers which reduce the current and voltage to allow characteristics of grid electricity to be measured and subsequently controlled. In addition, Pinetops manufactures sensors and a variety of protective equipment for the power grid, including overhead distribution cutouts, disconnect switches, and capacitor fuses.

Who we serve

Products manufactured in Pinetops are found throughout the electric grid and in neighborhoods and industrial facilities. Our products enable safe, efficient, and reliable electricity service to homes and businesses across the country.

ABB in the U.S.

ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.
