

ENERGY MANAGEMENT POLICY

of ABB BULGARIA EOOD¹

The policy of ABB Bulgaria EOOD, part of ABB Group, is to produce and deliver to its customers energy efficient products and solutions that help reducing carbon emissions. In addition to that, the company has been working for years to reduce the negative climate impact from its operations.

Reducing harmful emissions is possible due to the increasing energy efficiency and due to the use of energy-saving technologies. Energy consumption is monitored and measured regularly. Important energy aspects are checked and improved regularly.

The energy management policy is based on the values and is appropriate for the objectives of the organization. It sets out the main principles of action for all employees, and provides the framework for setting, regular reviewing and updating the organizational general and specific energy objectives. Elaboration of the objectives project will be affected by the results, achieved at every previous period.

The Management team of ABB Bulgaria is committed to:

- provide the necessary information and resources, necessary to achieve the general and specific energy objectives,
- carrying out its activities, in accordance with applicable legal and other requirements, in the field of energy efficiency and energy consumption, as well as in accordance with the international standard ISO 50001:2018,
- continuous improvement of the energy performance and of the energy management system.

The organization understands and accepts its responsibilities towards its staff, customers, suppliers, partners, and any party that may be affected by its activity.

Company management strives to continuously improve energy efficiency, by providing funding for the purchase of energy efficient products and services, and by supporting design activities that would have a positive effect on energy performance. Energy-oriented decisions are made responsibly and purposefully.

The successful implementation of the energy policy requires the efforts of all organizational units. That is why, all employees are responsible to take an active part in its implementation, by being informed about key energy issues, and by being involved in the energy efficiency management program.

The company regularly, and if necessary, informs external stakeholders about its energy aspects, energy consumption, and about its energy efficiency management program.

THE SENIOR MANAGEMENT OF ABB BULGARIA EOOD CLEARLY DECLARES ITS PERSONAL ENGAGEMENT AND RESPONSIBILITY IN THE IMPLEMENTATION OF THE ENERGY POLICY.

This Energy Policy has been brought to the attention of all stakeholders and is reviewed for propriety once a year by the company management.

The Energy Management Policy is digitally approved by the company management.
