Garant IP55

Socket outlets with side-earth contacts

New addition into the Garant IP55 range. With single and double socket option.

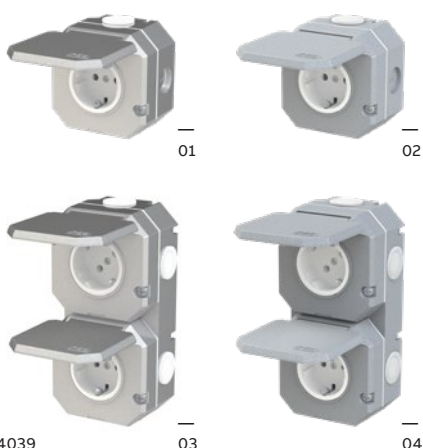

The Garant range of surface mounted wiring devices is designed to be robust and resistant thanks to the coated aluminium cover. Capable of meeting wiring requirements in all commercial and domestic applications from workshops to factories. The new socket-outlets with hinged lid are now available with side earth contacts (type F).

Benefits:

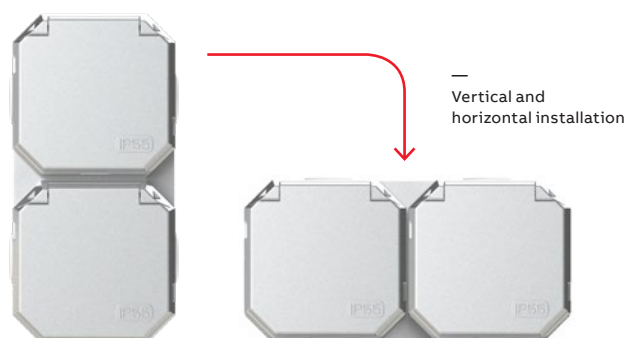

- Heavy duty aluminium case
- Vertical and horizontal installation
- Suitable for looped electrical installation
- Variable socket-outlet positioning
- Safety shutters
- Available in two colours: Silver and Grey hammer

Technical information:

- Screwed connection
- Surface mounted
- 250V, 16A
- IP55
