SET FREE mini

VARIABLE REFRIGERANT FLOW SYSTEM

AIR SOURCE

HEAT PUMP / HEAT RECOVERY TYPE

FS(V)NME SERIES / FSXNME SERIES

Cooling & Heating

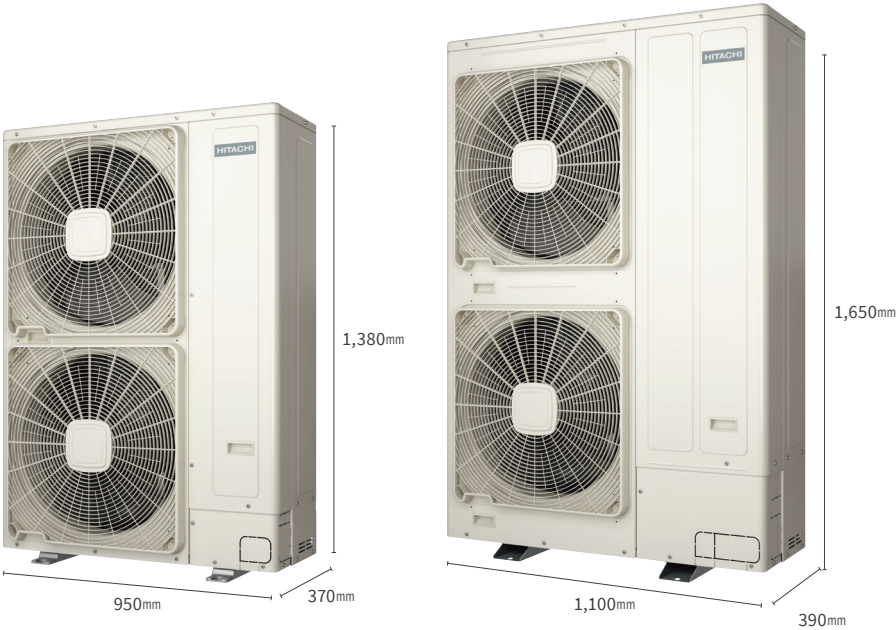

SIDE FLOW IS REACHING NEW HEIGHTS!

SET FREE mini, Hitachi SIDE FLOW, will meet the most demanding space constraints, thanks to this compact-size unit yet large capacity.
For the first time in the HVAC industry, simultaneous cooling and heating (Heat Recovery system) available from 8HP class to 12HP class, is no longer reserved to Top Flow VRF systems.

LINE UP OVERVIEW

DIMENSION & CAPACITY

With this compact size, it's an ideal product for application with space constraint. Furthermore, by achieving 12HP class in heat recovery, the Set Free mini allowed to cover applications usually reserved to top flow VRF.

Heat Pump

4HP Class / 12.1kW / 12.5kW / 114 (115*) kg
5HP Class / 14.0kW / 16.0kW / 114 (115*) kg
6HP Class / 15.5kW / 18.0kW / 118 (119*) kg

Note: Net weight Single phase (* 3 phase)

Heat Pump & Heat Recovery

8HP Class / 22.4kW / 25.0kW / 188kg
10HP Class / 28.0kW / 31.5kW / 194kg
12HP Class / 33.5kW / 37.5kW / 196kg

SUMMARY TABLE

		Unit	FS(V)NME series	FSXNME series
Power Supply			1N~, 230V 50Hz 3N~, 400V 50Hz	3N~, 400V 50Hz
Capacity	HP Class	HP	4-6	8-12
	Nominal Cooling	kW	12.1-15.5	22.4-33.5
	Nominal Heating	kW	12.5-18.0	25.0-37.5
Maximum connectable indoor unit quantity		Units	13-18	26-39
Range of combination capacity		%	50-130	50-130
Maximum piping length	Total liquid piping length	m	180	500
	Between outdoor unit and farthest indoor unit	m	85	125
	Between 1st branch multi kit and farthest indoor unit	m	40	90
	Between multi kit and each indoor unit	m	15	40
Maximum level difference	Between Outdoor unit and Indoor unit ※ ODU Above IDU	m	30	50
	Between Indoor unit and Indoor unit	m	15	15
Cooling operation working range (outdoor temperature)		°C DB	-5.0 to 48.0	-5.0 to 48.0
Heating operation working range (outdoor temperature)		°C WB	-20.0 to 15.0	-20.0 to 15.0

*For more details, please consult your distributors or dealer, or, refer to technical manuals.

COMFORT

GENTLECOOL: Hitachi Exclusive

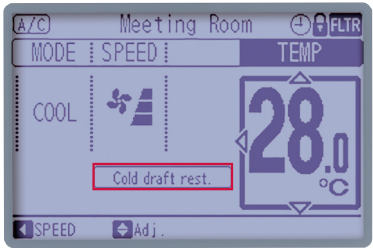

Set your comfortable temperature not only for “Room” but also for “Air” in cooling operation.

To make your room reach to the desired temperature faster, the discharged air from the indoor unit can be sometimes much cooler, causing discomfort at the beginning of operation.

Now, you can choose “discharge air temperature = your own comfort level”, as you like, by our advanced wired remote controller PC-ARFP1E.

You can be in comfort and avoid cold draft from the moment when cooling operation starts, while the room gently cools down.

"Comfort Setting" Control Cool Air in PC-ARFP1E

Potential Discomfort

GentleCool → No Cold Draft

GentleCool: OFF

GentleCool: LOW

GentleCool: MED

GentleCool: HIGH

AIR SOURCE HEAT PUMP / HEAT RECOVERY TYPE

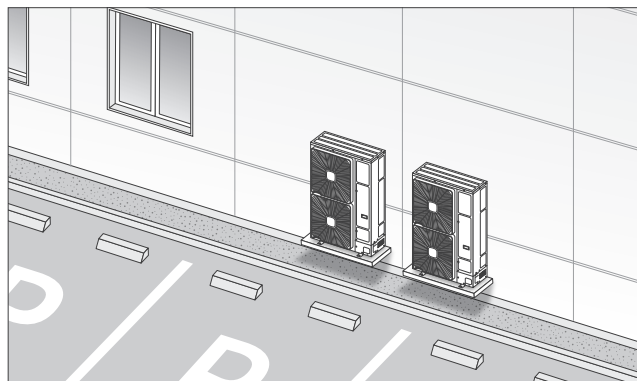

LINE UP OVERVIEW

DESIGN FLEXIBILITY

COMPACT

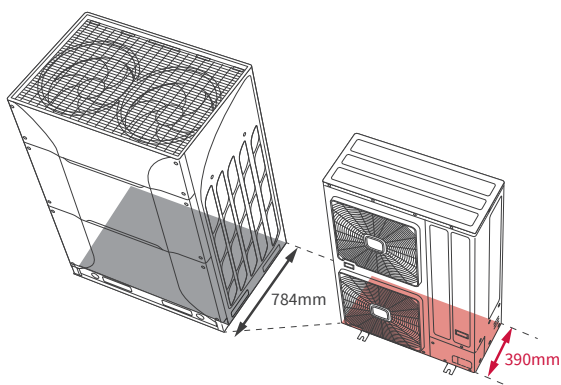

Thanks to Ultra-compact footprint with bigger capacity, our SET FREE mini outdoor units can be placed discreetly out of sight or configured to optimize space usage.

12HP Class Comparison

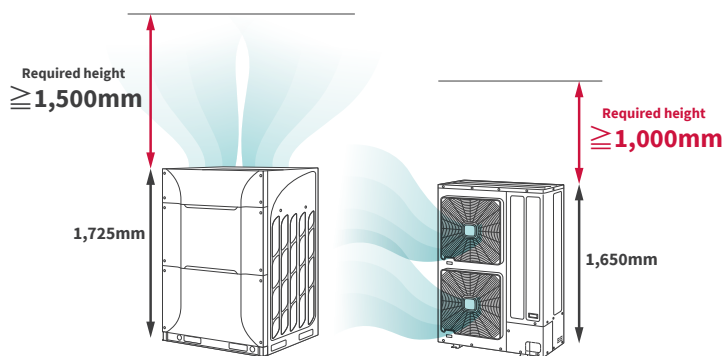

Depth difference -394mm

Footprint requirement -43%

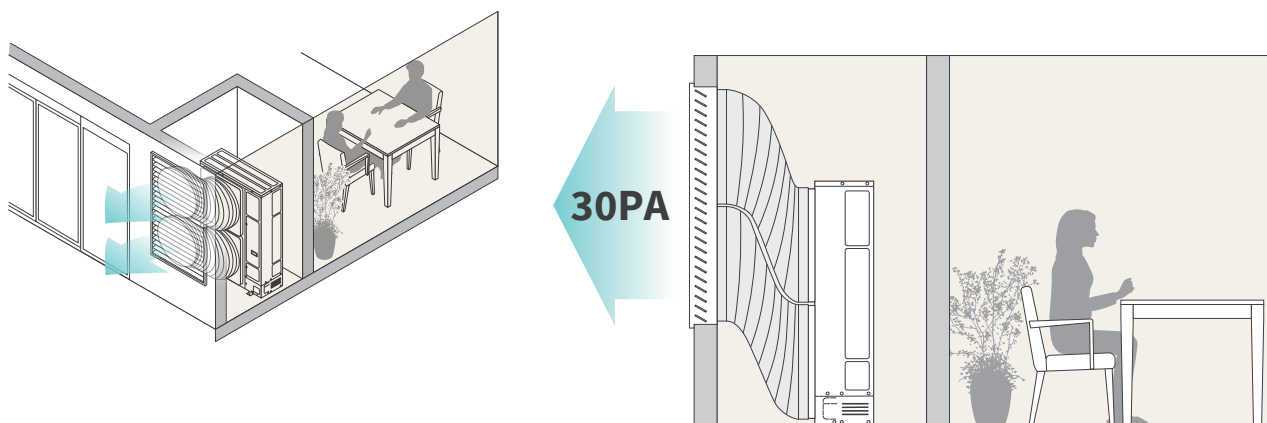

Required height difference -575mm

Height requirement -18%

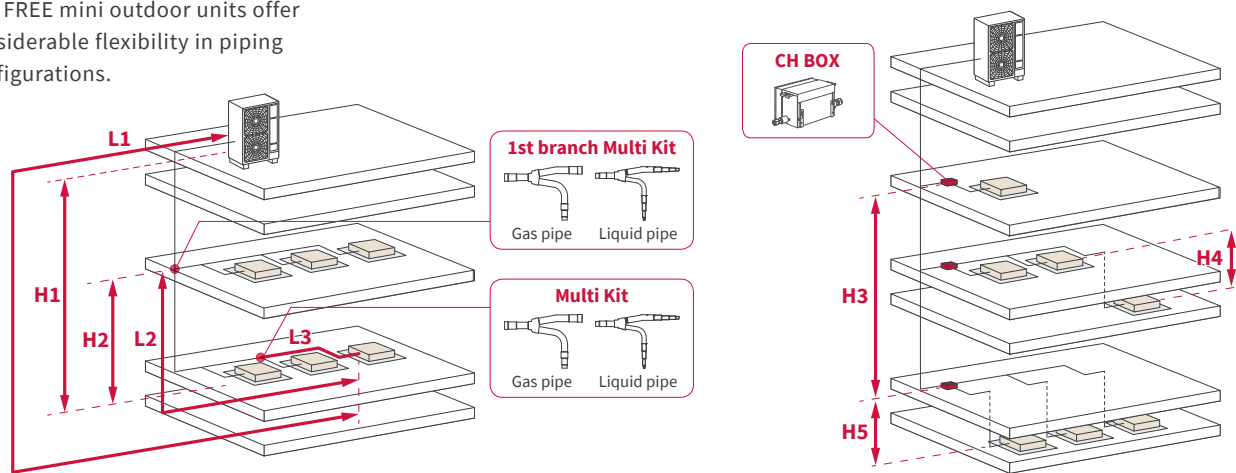

POWERFULNESS IN AIR

Our SET FREE mini outdoor units are designed to be located internally by the straightness of air flow thanks to higher external static pressure with DC inverter fan, leading to more options for installation and visual aesthetics of buildings.

MORE PIPING CAPABILITIES

To aid in the design process, SET FREE mini outdoor units offer considerable flexibility in piping configurations.

		Example	4 to 6HP class (Heat Pump)	8 to 12HP class (Heat Pump)	8 to 12HP class (Heat Recovery)
Maximum Piping Length	Total		180	500	500
	Between ODU and the farthest IDU	L1	85	125	125
	Between 1st branch Multi Kit and the farthest IDU	L2	40	90	90
	Between Multi Kit and each IDU	L3	15	40	40
	Between CH-Box and Indoor Unit		-	-	40
Maximum Level Difference	Between ODU and IDU	ODU above IDU IDU above ODU	30 30	50 40	50 40
	Between IDUs	H2	15	15	15
	Between CH-Box	H3	-	-	15
	Between Indoor Units connected to same branch of CH-Box	H4	-	-	4
	Between CH-Box and Indoor Unit	H5	-	-	15

(m)

HARMONY IN ANY CLIMATE

Because we live in a diverse and changeable world, SET FREE mini outdoor units are designed to perform faultlessly in the coldest or hottest of climates, to ensure a consistently comfortable temperature in every room.

CONNECTION UP TO 39 INDOOR UNITS

Diverse building applications have diverse rooms with different needs. Our SET FREE mini outdoor units can meet any indoor requirements thanks to introduction of the new 0.4HP indoor units compatibility. This can help you save the initial costs with the capacity of connection up to 39 indoor units.

Outdoor Unit Capacity (HP class)	4	5	6	8	10	12
Max Number of Connectable Indoor Units	13	16	18	26	32	39

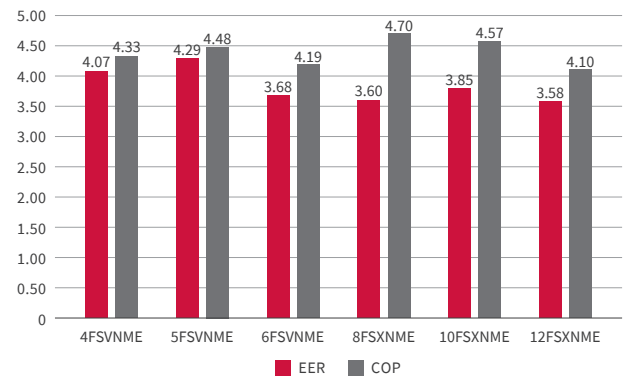

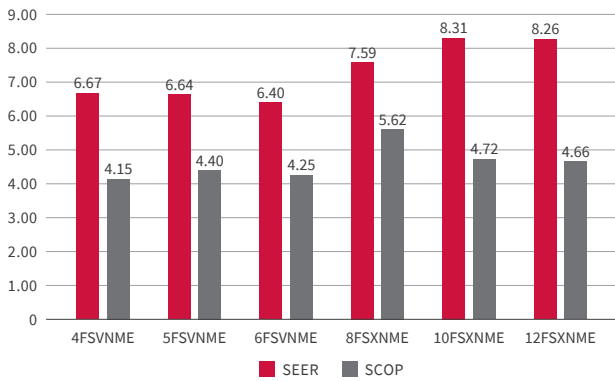

NOTES:

*: For a system in which all indoor units are operated simultaneously, the maximum total capacity will be 100%. Determine the number of indoor units carefully so that a problem such as decreased outlet air temperature will not occur. Refer to the technical catalog for more details.

BETTER PERFORMANCE

SETTING THE STANDARD

SET FREE mini lifts performance and efficiency to a new level. Both will reward you with superior performance as well as significant energy and cost savings.

THE BEAUTY OF SILENCE

Balance is the key to harmony, so SET FREE mini outdoor units incorporates advanced features to ensure a more peaceful environment with less disturbance to the outside environment

SMART DEFROSTING

Frost on the outdoor unit's heat exchanger reduces heating capability. Defrosting is, therefore, essential, although there is no heating in a defrosting operation. Intelligent defrosting technology automatically learns the operating data of the fan motor. From these data it determines the optimal operation of the next defrosting cycle, thereby helping to reduce the frequency of defrosting while enhancing the comfort level and heating capacity.

SMOOTH DRIVE: SUPERIOR REFRIGERANT CYCLE CONTROL

“Smooth Drive” is designed to solve the issue that “COP is much lower in low load operation” which has been raised by specialists for long time, by optimizing both compressor and fan operation in the smoothest way.
Exclusive to Hitachi VRF technology, this newly developed refrigerant cycle control technology, Smooth Drive, helps you achieve new standards in performance and efficiency with our new outdoor units.

How does it benefit you?

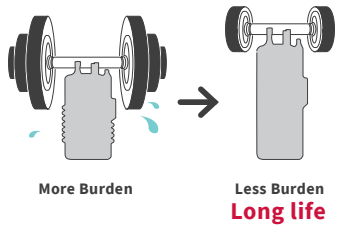

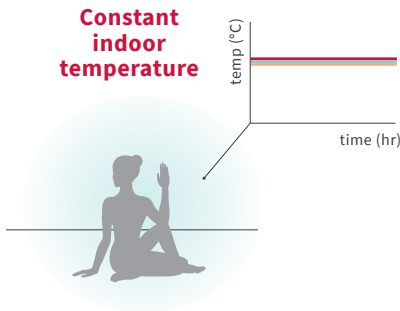

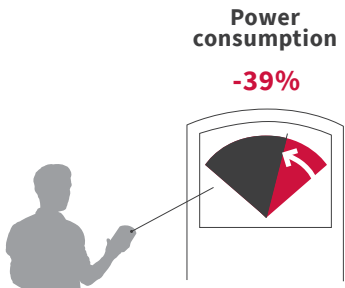

Efficiency
Power consumption is reduced by -39% in the testing condition at air conditioning load 33%.

Comfort
More constant indoor temperature achieved by better responsiveness thanks to direct compressor frequency control.

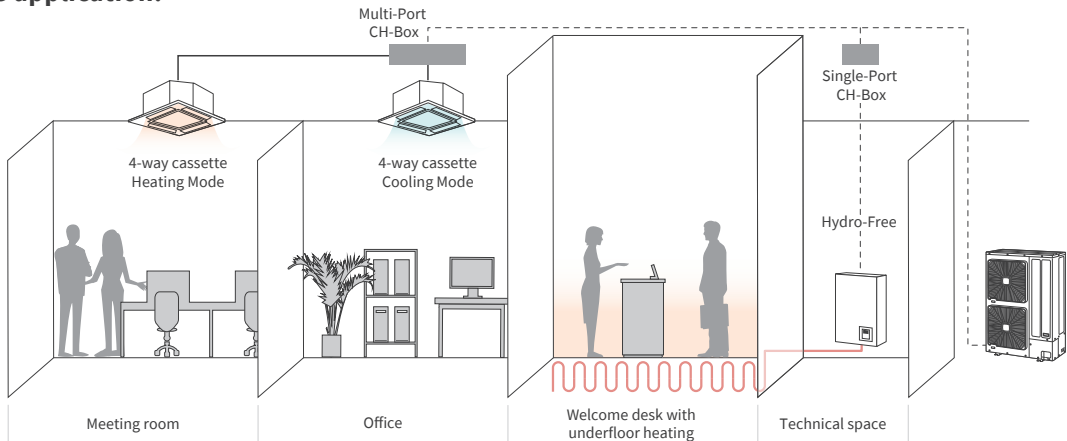

Reliability
Less burden on compressor thanks to suppressing continuous on/off at low load operation, leading to less liquid-back and less shock into the scroll compressor.

CREATING PERFECT INDOOR ENVIRONMENT

By using and transferring excess energy from one zone to another, Heat recovery systems from 8 to 12HP class provide simultaneous cooling and heating leading to your optimized energy consumption and great comfort.

Office application:

RELIABILITY

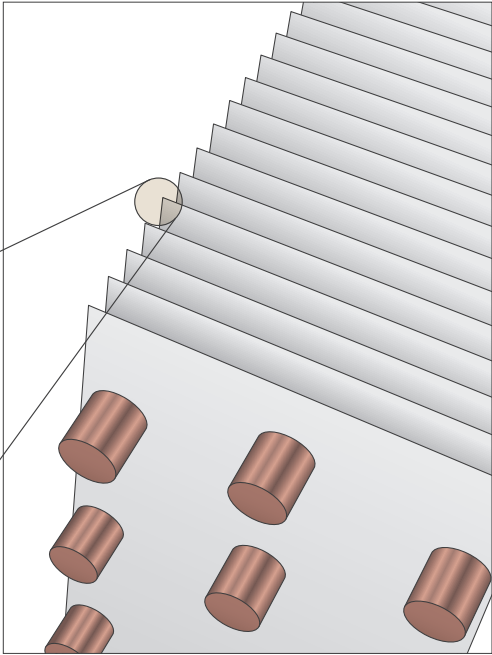

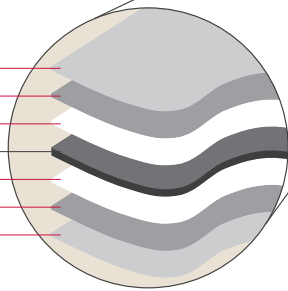

ENHANCED PROTECTION

If your project is in a location with extreme conditions such as sea-side or industrial area with fumes from factories, our 3 coating layers treatment to your outdoor units makes sure for better life-expectancy.

- Strong protection from various corrosive external conditions like salty environments or industrial areas

3 Coating Layers

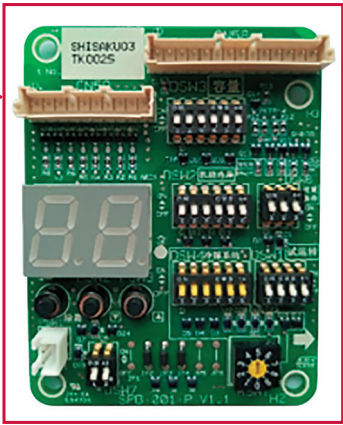

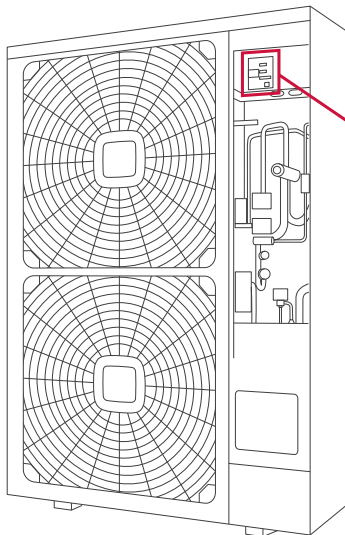

- Lubricative coating
- Hydrophilic coating
- Anti-corrosive coating
- Aluminum fin
- Anti-corrosive coating
- Hydrophilic coating
- Lubricative coating

SIMPLE AND EASY CHECK

User-friendly service board with dial code switch and push button is designed for easier testing and diagnostics. The service board, which is located in front of the outdoor unit, is easy to set.

- Monitoring real-time running status
- Displaying the fault code for diagnostics
- Checking historical fault information
- Optimizing control parameters based on the installation field condition

SPECIFICATIONS

NOTES:

1. Performances are based on the following conditions:

Cooling Temperature: Indoor 27.0°C DB/19.0°C WB / Outdoor 35.0°C DB/24.0°CWB

Heating Temperature: Indoor 20.0°C DB/15.0°C WB / Outdoor 7.0°C DB/6.0°C WB

Eurovent test condition: Type of indoor unit connected is only Cassette.

Refer to EUROVENT certification regulation for more detail test conditions

Refer to EUROVENT website for test values connected Ceiling concealed duct type indoors

2. The sound pressure level is based on following conditions: 1.0 meter from the unit service cover surface, and 1.5 meter from floor level. The above data is based on the cooling mode. In case of heating mode, the sound pressure level increases by approximately 1-2 dB (A). The above data was measured in an anechoic chamber. Therefore, reflected sound should be taken into consideration in the field.

3. If the specified main refrigerant piping on the table is not available on site, use the following pipe diameter with an appropriate reducer on site. If φ25.4 pipe is not available, please use φ28.58 pipe. If φ31.75 pipe is not available, please use φ34.92 pipe. If φ38.1 pipe is not available, please use φ41.28 pipe.
