

AIR CONDITIONING  
AND AIR QUALITY  
PARTNER

*Inspiring Solutions since 1989*

# Our range of products

Clivet specializes in providing comprehensive solutions for residential, commercial, and industrial requirements.

Explore our complete range of products.

# The new series with R290

Clivet's technological choices have always been aimed at reducing the environmental impact of its products throughout their entire life cycle.

Always at the forefront of the development of ultra-low GWP systems, Clivet is developing several lines with the **natural refrigerant R290** (propane), a natural gas with excellent thermodynamic properties and already complies with the most stringent European regulatory developments.

This technology makes it possible to respect the environment and achieve performance that guarantees optimum comfort.

The new models range includes:

## Thunder

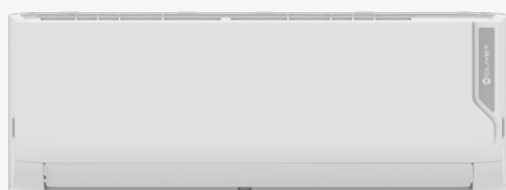

The new energy-efficient, full-inverter air-cooled heat pump with natural refrigerant R290 from 40 to 80 kW.

## Edge F

The versatile, compact and quiet residential air-to-water heat pump.

## Cervino

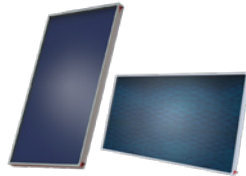

The split designed with the environment and the future in mind.

All these series are characterized by high heating capacity, operation even in extreme climatic conditions and, of course, maximum environmental compatibility.

# Clivet Smart Living

Clivet Smart Living is a complete package for managing the comfort and energy efficiency of individual homes, apartments and small businesses.

It incorporates cutting-edge technologies, and focuses on the well-being of people in the settings where they live and work.

## ELFOSUN3

It uses renewable energy and contributes greatly to the increase in the building's energy class.

It can be combined in series and is ideal for empty and pressurised systems

## SINERGY ESS

Electrical energy storage, to ensure maximum efficiency of independent supply during evening hours

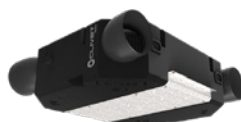

## SPHERA

Split type heat pump and domestic for space heating and sanitary hot water. Compatible with solar thermal and photovoltaic system.

## EDGE F

High-efficiency air-to-water packaged heat pump that uses the new refrigerant R290

## ELFO FRESH

Active thermodynamic recovery ventilation system to ensure the highest level of indoor air quality

## CONTROL4 NRG

System energy assistant with electricity and thermal storage management.  
Remote automatic software updates to keep the system in line with new available functions

## CLIVET EYE

Cloud solution for remote system control and management from a single App with display of energy levels produced and consumed by the home

## AIR QUALITY SENSOR

Acquisition of temperature, humidity, noise, VOC carbon monoxide, carbon dioxide and methane values

## FAN COILS, RADIANT PANELS

Quiet, efficient fan coils, with slimline design

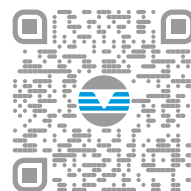

FOR OVER 30 YEARS, WE HAVE BEEN OFFERING  
OUR CLIENTS INNOVATIVE SOLUTIONS,  
IMPROVING COMFORT LEVELS  
WHILE SAVING ENERGY
