

PMA Divisible System

Divisible Cable Protection System, also for retrofit applications

© PMA 11/2015

PMA offers a divisible system based upon standard nominal widths.

This allows free combination of the PACOF, PPCOF divisible conduits with PMAFIX Pro, PMAFIX and Smart Line fittings. Repairs can be easily made to existing installations without disconnecting cables.

Equally all PMA conduit types – also slit versions – are compatible with the fittings (BLNO, BLTO, BLYO) and the T- and Y-junctions of the divisible system.

Conduits

PACOF (PA6) / PPCOF (PP)

- Can be opened and closed again along its length at any time
- PMA standard nominal widths
- Can be used in combination with all PMA fittings
- Easy installation
- Trouble-free retrofitting
- Applicable also for repairs
- etc.

Fittings, T- and Y-junctions (PA6)

- Easy installation
- Sealing classification IP54, resp. IP40
- Conduit can be installed in fitting prior to closing
- Push-in installation of conduit into pre-installed fitting also possible
- High conduit pull-out strength
- Integrated thread sealing lip
- Extremely high impact resistance
- etc.
