Eco-participation modulation

Since July 1st 2020, eco-participation modulation criteria has applied to professional EEE (except categories 12 & 13), according to the conditions below:

- For all EEE of categories 1 to 10 containing at least 20% plastic by mass:
 - Criterion "Incorporation of post-consumer recycled plastic": At least 20% by mass of all of the plastic in the appliance is derived from post-consumer recycled plastic;
- For all EEE of categories 1 to 10 containing at least 20% plastic by mass and containing flame retardants:
 - Criterion "Absence of bromine in plastic parts containing flame retardants": Absence of bromine in all plastic parts of more than 25 grams containing flame retardants, excluding electronic cards and power cables;
- For refrigerating appliances with a direct sales function, chest freezers, electronic displays, welding equipment and emergency lighting systems (equipment types indicated by  in the present contribution scale).
- Criterion "Availability of spare parts": Existence of contractual documents providing for the availability of essential spare parts for the use of the appliance for a period greater than or equal to the following minimum period, for each

equipment type eligible:

- Refrigerating appliances with a direct sales function: 10 years;
- Chest freezers: 15 years;
- Electronic displays: 10 years;
- Welding equipment: 15 years;
- Emergency lighting systems: 8 years.

Where products are eligible for multiple modulation criteria, they are entitled to combine modulations according to the following terms:

- until December 31st 2020 : 1 fulfilled criterion = -10%, 2 fulfilled criteria = -15%, 3 fulfilled criteria = -20%;
- as from January 1st 2021 : 1 fulfilled criterion = -20%, 2 fulfilled criteria = -30%, 3 fulfilled criteria = -40%.

For more precisions about eligible products and required documentary evidence, please consult the technical note about modulation criteria applying to Professional EEE (www.ecosystem.eco/fr/article/ressources-documentaires).

⁽⁵⁾ **Excluding "Large fixed industrial tools"** • Large fixed industrial tools excluded from the WEEE regulation must meet several cumulative criteria, including weighing more than 2 metric tons and measuring over 2.5 m along the side (see definition in article R543-172-1-III of the Environment Code and in § 3-A of the Notice to Producers, issued by the French Ministry of Ecology on 27 November 2014).

⁽⁶⁾ **Excluding "Off-road mobile machinery"** • Off-road mobile machinery excluded from the WEEE regulation must cumulatively have an autonomous source of electrical energy (such as a battery) and drive wheels ensuring displacement without any external effort (human or mechanical) (see definition in article R543-172-1-III-2° of the Environment Code).

⁽⁷⁾ Sub-assemblies (e.g. accessories, engines, power supplies...) specifically intended to be integrated into EEE must be recorded in the relevant EEE subcategory.

Category 13 – Professional equipment for production, conversion and storage of LV electrical energy ⁽¹¹⁾							
SMALL EQUIPMENT OF DIMENSION LESS THAN OR EQUAL TO 50 CM	10380	Small equipment cat.13 ≤ 50 cm	- Equipment which main function is to convert/transform/store LV electrical energy within a LV distribution network UPS (Uninterruptible Power Supply), of a power less than 375 kVA, with triple-phase output Inverter (except photovoltaic inverter) Rectifier, current charger with a power: <ul style="list-style-type: none">• less than 3 kVA, rack-type or tower-type, of weight > 10 kg• between 3 kVA and 300/337 kVA, cabinet-type, of weight > 10 kg Frequency converter	Not applicable	P13.01	€0.050	Cat. 05
LARGE EQUIPMENT OF DIMENSION MORE THAN 50 CM	10381	Small equipment cat.13 > 50 cm	- Energy storage equipment or system, stationary, not for residential use, modular or not and integrating control and protection devices, integrating batteries or not	Not applicable	P13.02	€0.028	Cat. 04
GENERATING SETS	10382	Generating set <ul style="list-style-type: none">- Mobile- Fixed with a power less than 375 kWe		Not applicable	P13.03	€0.022	Cat. 04
GENERATORS AND TRANSFORMERS	10383	Generator and transformer <ul style="list-style-type: none">- Low voltage electrical generator for small wind plant or hydroelectric micro power station- Low voltage (in or out) dry-type transformer of less than 375 kVA		Not applicable	P13.04	€0.015	Cat. 04

(11) EEE of categories 12 and 13 are not concerned by eco-participation modulation.

New regulatory categories defined by Article R543-172-III of the French Environment Code:

Cat. 01: Temperature exchange equipment

Cat. 02: Screens, monitors, and equipment containing screens having a surface greater than 100 cm²

Cat. 03: Lamps

Cat. 04: Large equipment

Cat. 05: Small equipment

Cat. 06: Small IT and telecommunication equipment

IMPORTANT:

List of equipment is non-exhaustive (for more information on the equipment concerned, consult the Notice to Producers, issued by the French Ministry of Ecology on 27 November 2014, or contact **ecosystem**).

In accordance with the provisions of Article R543-172-IV of the French Environment Code, electrical and electronic sub-assemblies intended to be connected to each other in a modular and reversible way* by means of tangible or intangible joins are considered to be EEE within the scope of the contract (e.g.: replacement pump for industrial cleaning equipment...), except when they are sold to Producers of electrical and electronic equipment in which the said sub-assemblies are intended to be integrated (e.g.: ballast sold in OEM to a lighting manufacturer, specific engine sold in OEM to a pump manufacturer, pump sold in OEM to a suction system manufacturer for a dental treatment station, input/output module sold in OEM to a manufacturer of industrial PLCs...).

* A join (excluding any bonding, welding or crimping) is considered reversible when it can be separated by mechanical actions, such as unscrewing, by simple and commonly used tools.
