

# Only original. Only ABB.

ABB has recently identified an increasing number of counterfeit spare parts that have been installed in original ABB equipment. Our team has also identified several counterfeit spare part distributors. It is our duty to inform you and help you spot counterfeit to avoid potential damaged to your equipment and maintain the safety of your crew and vessel. [Here is a 3-step guide to help you verify ABB parts:](#)

- 1 All genuine serial numbers are listed in ABB installed base to allow for checking.
- 2 Do a price comparisson. Any price difference could indicate a counterfeit or secondhand part.
- 3 Check your local ABB tracking system for other ABB products and components.

**How to make sure you do not put your asset at risk?**
