

Connect with ABB at the World Petroleum Congress  
Moscow June 15-19, 2014

Power and productivity  
for a better world™

## Connect with ABB's senior management and oil and gas experts at the 21st World Petroleum Congress in Moscow

We welcome you to visit us at WPC from 15th-19th June, 2014.

Experts will be on hand in Hall 13 Booth E14 to discuss and demonstrate how ABB systems and expertise can help solve the oil and gas industry's power and automation needs today and in the future.

ABB's solutions help the industry achieve safe, reliable and efficient operations. We will be demonstrating how we can help you to improve the operational effectiveness of your plant, increase energy efficiency across your processes and maximize the lifecycle of your assets. Our experts will also present the latest advances in subsea electrification and solutions for the arctic.

ABB is a leader in power and automation technologies, with more than 50 years of experience in supplying both innovative and proven solutions to the oil and gas industry.
